

MOTOROLA VHF M130 Base Station Radio

Radios that WILL work in the bush

GENERAL

These are re-furbished radios meeting as-new Manufacturer's Specifications. They are extremely durable and moisture resistant

VHF Radios are more suited to Bush & Rural use such as Agriculture, Hunting, Campsites, Hiking, Skiing, & Forestry applications, Etc.. Reliable range from Base to Handheld of up to 20 Km can be expected (depending on base antenna)

VHF is not recommended for Urban use, downtown, within large buildings or between buildings.

For Urban use or within and between buildings, UHF Radios are suggested.

We will program this radio to your frequency and Tone Codes if known or, if not known, you can send us one of your existing radios which we will copy & return. There is no charge for programming.
