

MOTOROLA VHF HT1000 Handheld Radio **(Sold as a package of 6 or, individually)**

Radios that WILL work in the bush

GENERAL

These are re-furnished radios meeting as-new Manufacturer's Specifications. They are extremely durable and moisture resistant and are generally ex-US Prison, Fire Dept & Highway Patrol radios

VHF Radios are more suited to Bush & Rural use such as Hunting, Campsites, Hiking, Skiing, Farm & Forestry applications, Etc.. Reliable range of 10-15 Kms between radios can be expected.

They are not recommended for use downtown, within large buildings or between buildings

For Urban use or within and between buildings, UHF Radios are suggested

These Radios are supplied programmed to talk to each other. We will also program to your frequency if known or, if not known, you can send us one of your existing radios which we will copy & return. There is no charge for programming
